

Dear Authors,

In accordance with the journal's policy on the use of artificial intelligence (AI) in scholarly publications, all authors are required to complete and submit an **AI Contribution Declaration Form** at the time of manuscript submission.

In line with the recommendations of the **Committee on Publication Ethics (COPE)** and the **International Committee of Medical Journal Editors (ICMJE)**, authors must transparently disclose the use of AI-assisted technologies in manuscript preparation, including the specific tools used and the nature and extent of their contributions.

The journal reserves the right to assess submitted manuscripts using AI-detection tools to evaluate potential AI involvement in manuscript preparation. In cases where discrepancies are identified between the authors' declarations and the assessment results, the Editorial Office may request further clarification. If a significant discrepancy or undisclosed AI use is confirmed, the manuscript may be removed from the submission system and the review process discontinued.

For further information, authors are strongly encouraged to consult the following guidelines:

- **COPE:** [Authorship and AI Tools](#)
- **ICMJE:** [Recommendations on the Use of Artificial Intelligence in Publishing](#)

Thank you for your understanding and cooperation.

Editorial Office
